- |                           |                              |
|---------------------------|------------------------------|
| • Vue.js / Nuxt           | • Figma                      |
| • HTML 5 & CSS 3          | • Wireframing                |
| • Sass & Scss             | • Prototyping                |
| • JavaScript / TypeScript | • PL/SQL                     |
| • Angular 8               | • Microsoft Power Bi         |
| • Quasar Framework        | • Oracle BI Publisher        |
| • Bulma.io                | • Tableau                    |
| • Buefy [Contributor]     | • Software Technical Writing |
| • Tailwindcss             | • SCRUM                      |
| • Bootstrap               | • Sendgrid                   |
| • C# / ASP.Net            | • Office 365                 |
| • Adobe Photoshop         | • SharePoint Online          |
| • Adobe XD                | • Shopify                    |

</skills>

## <projects>

**Servicios en Línea - Punto Solidario:** Client self-service for citizens that have a Solidarity Card, allowing them to manage their personal information and create complains. Built using Vue.js, JavaScript and Bulma.io.

[Website](#)

**Softwarelabs.com.au:** Total redesign of previous website, enhancing load performance over 100%, using the latest web design trends. Made with Bulma.IO.

[Website](#)

**www.specifierlab.com:** Designed from scratch, using the latest web design trends. Made with Bulma.IO. and integrated on Angular.

[Website](#)

**Papudex:** Pokémon Pokedex clone. Using the public “POKEAPI” API. Built using Angular 8, TypeScript and Bulma.io.

[Live Demo](#)[Code](#)

**Pizza Collect App:** App to divide pizzas cost for a quantity of people depending on how many pieces they will eat. Built using JavaScript and Bootstrap 4.

[Live Demo](#)[Code](#)

**Dinner Roulette:** While taking a mobile application development course on Android. We were motivated to choose a final project. My idea was to create an application to randomly choose where to go to dinner with my girlfriend, because women never know where they want to have dinner. Built using Java on Android Studio.
