<Projects>

Servicios en Línea - Punto Solidario: Client self service for citizens that have a Solidarity Card, allowing them to manage their personal information and create complains. Built using Vuejs, JavaScript and Bulma.io.

[Website]

Papudex: Pokémon Pokedex clone. Using the public "POKEAPI" API. Built using Angular 8, TypeScript and Bulma.io.

[Live Demo] [Code]

Pizza Collect App: App to divide pizzas cost for a quantity of people depending on how many pieces they'll eat. Built using JavaScript and Bootstrap 4.

[Live Demo] [Code]

Dinner Roulette: While taking a mobile application development course on Android. We were motivated to choose a final project. My idea was to create an application to randomly choose where to go to dinner with my girlfriend, because women never know where they want to have dinner. Built using Java on Android Studio.

[Code]

</Projects>
